

Join One of the Fastest-Growing Professions in the U.S.

Registered Dental Assistant

For info, contact Tami Russell PDX@unt.edu • 940.369-7363 • Enroll unt.edu/pdx-dental

According to the Bureau of Labor Statistics, dental assisting is one of the fastest-growing occupations in the U.S. Dentists have voiced support for increasing the supply of trained professionals in an effort to improve patient care.

The University of North Texas Professional Development Experience Registered Dental Assistant program offers hands-on training during a 16-week program. Students meet two evenings per week and a couple of select Saturday afternoons.

These hours include an important Externship in which participants work and observe in a functioning dental facility, train with x-ray systems, and utilize dental practice software while preparing to take the State Licensing Exam at the conclusion of the program.

Curriculum Includes

Radiology, vital signs, patient care, four-handed dentistry, dental impressions, sterilization, infection control, delivery of dental materials, temporary crowns, nitrous oxide certification, and CPR/AED training.
